

SERVICE MANUAL

FULLY AUTOMATIC DD TURNTABLE

SANSUI P-L45/L55

(Silver & Black Model)

● SPECIFICATIONS

Type	Direct-drive turntable
Rated speeds	33-1/3, 45 rpm
Platter	Aluminum alloy diecast, 306 mm (12-1/16") diameter, 0.75 kg (1.7 lbs.) weight
Motor	Coreless and Brushless DC/FG Servo
Wow/flutter	0.04% (WRMS)
Signal-to-noise ratio	Better than 72 dB (DIN-B) Better than 60 dB (IEC-B)
Effective tonearm length	140 mm (5-1/2")
Power voltage	110 ~ 120/220 ~ 240 V (50/60Hz)
For U.S.A. and Canada	120 V (60 Hz)
Power consumption	
P-L45	20 W
P-L55	22 W
Dimensions	430 mm (16-29/32") W 95 mm (3-3/4") H 374mm (14-23/32") D
Weight	5.6 kg (12.4 lbs.) net 6.7 kg (14.7 lbs.) packed

Specifications of the cartridge (applicable only to the units with cartridge)

Model SV-P313

Type	Dual Magnet type
Output voltage	2.5 mV (1,000 Hz, 35.4 mm/sec)
Correct load impedance	47 kohms
Frequency response	20 ~ 20,000 Hz
Stylus	0.6 mil diamond stylus (SN-P313 replacement stylus)

- Design and specifications subject to change without notice for improvements.
- Due to local laws and regulations, this unit sold in some areas are not equipped with variable voltage selectors.

CAUTION

1. Parts identified by the \triangle symbol on the schematic diagram and the parts list are critical for safety. Use only replacement parts that have critical characteristics recommended by the manufacturer.
2. Make leakage-current or resistance measurements to determine that exposed parts are acceptably insulated from the supply circuit before returning the appliance to the customer.

SANSUI ELECTRIC CO., LTD.

CAUTION

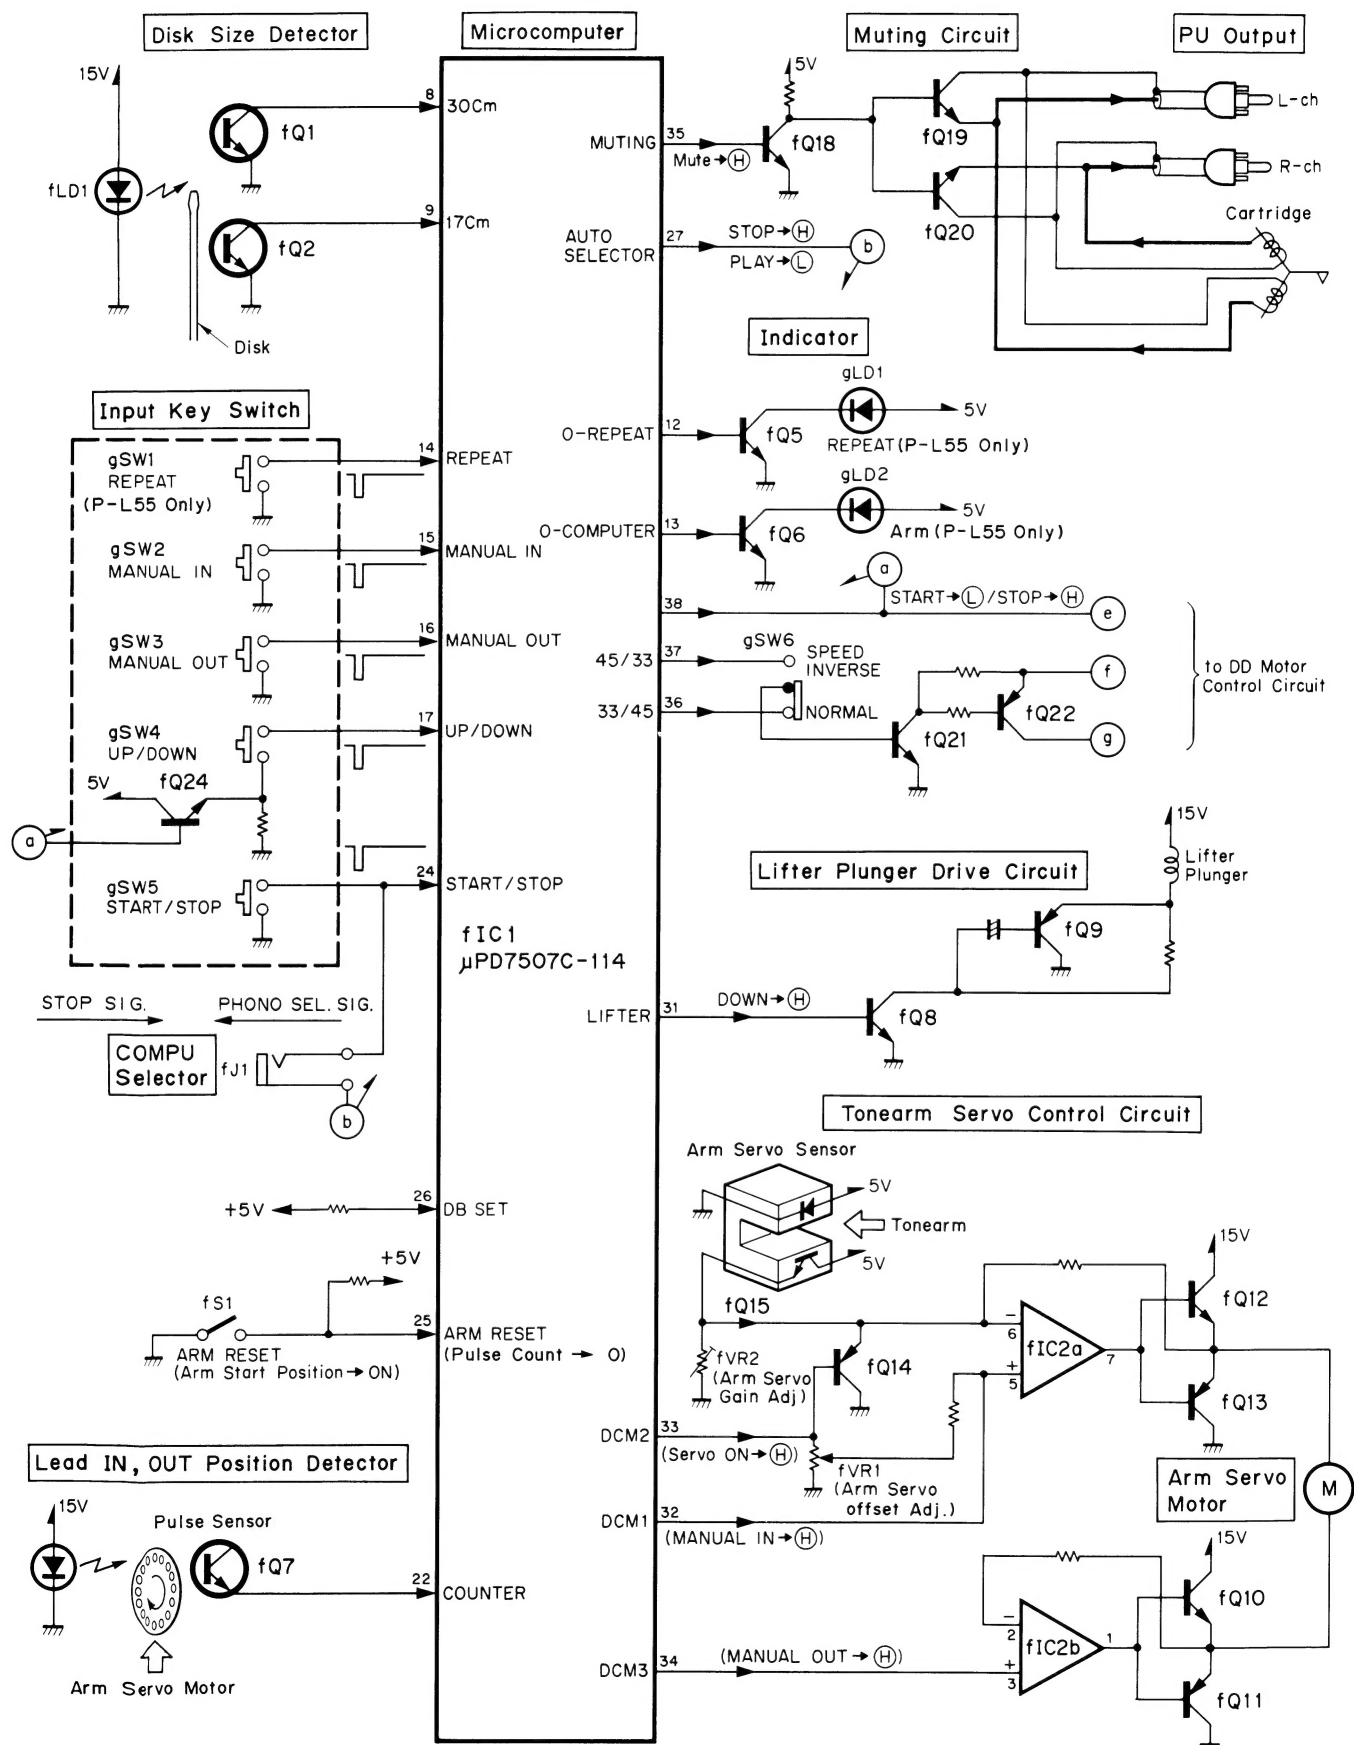

1. The symbols, UL, CSA, SA, BS, UK, EU, AS and XX on the parts list and the schematic diagram mean followings respectively.
 UL Manufactured for U.S.A market.
 (Underwriters Laboratories approved model.)
 CSA Manufactured for Canadian market.
 SA Manufactured for South African market.
 BS, UK Manufactured for United Kingdom market.
 EU Manufactured for European market.
 AS Manufactured for Australian market.
 XX Standard Version.
 NON MARK Common Parts.
2. Some printed circuit boards are not supplied as the assembled.
 To separate these in this service manual, the stock No's are not indicated at the ends of the board names. However, the individual parts on the circuit boards are provided by orders.
3. Since some of capacitors and resistors are omitted from parts lists in this service manual, refer to the Common Parts List for capacitors & resistors, which was issued on February 1983.
4. Abbreviations in this service manual are as follows.

• Abbreviations List

C.R. : Carbon Resistor	E.B.L. : Low Leak Bi-Polar
S.R. : Solid Resistor	Electrolytic Capacitor
Ce.R : Cement Resistor	Ta.C. : Tantalum Capacitor
M.R. : Metal Film Resistor	F.C. : Film Capacitor
F.R. : Fusing Resistor	M.P. : Metalized Paper
N.I.R. : Non-Inflammable Resistor	Capacitor
A.R. : Array Resistor	P.C. : Polystyrene Capacitor
C.C. : Ceramic Capacitor	G.C. : Gimmic Capacitor
C.T. : Ceramic Capacitor,	A.C. : Array Capacitor
Temperature Compensation	V.R. : Variable Resistor
E.C. : Electrolytic Capacitor	S.V.R. : Semi Variable Resistor
E.L. : Low Leak Electrolytic	SW. : Switch
Capacitor	Chip R. : Chip Resistor
E.B. : Bi-Polar Electrolytic	Chip C. : Chip Capacitor
Capacitor	

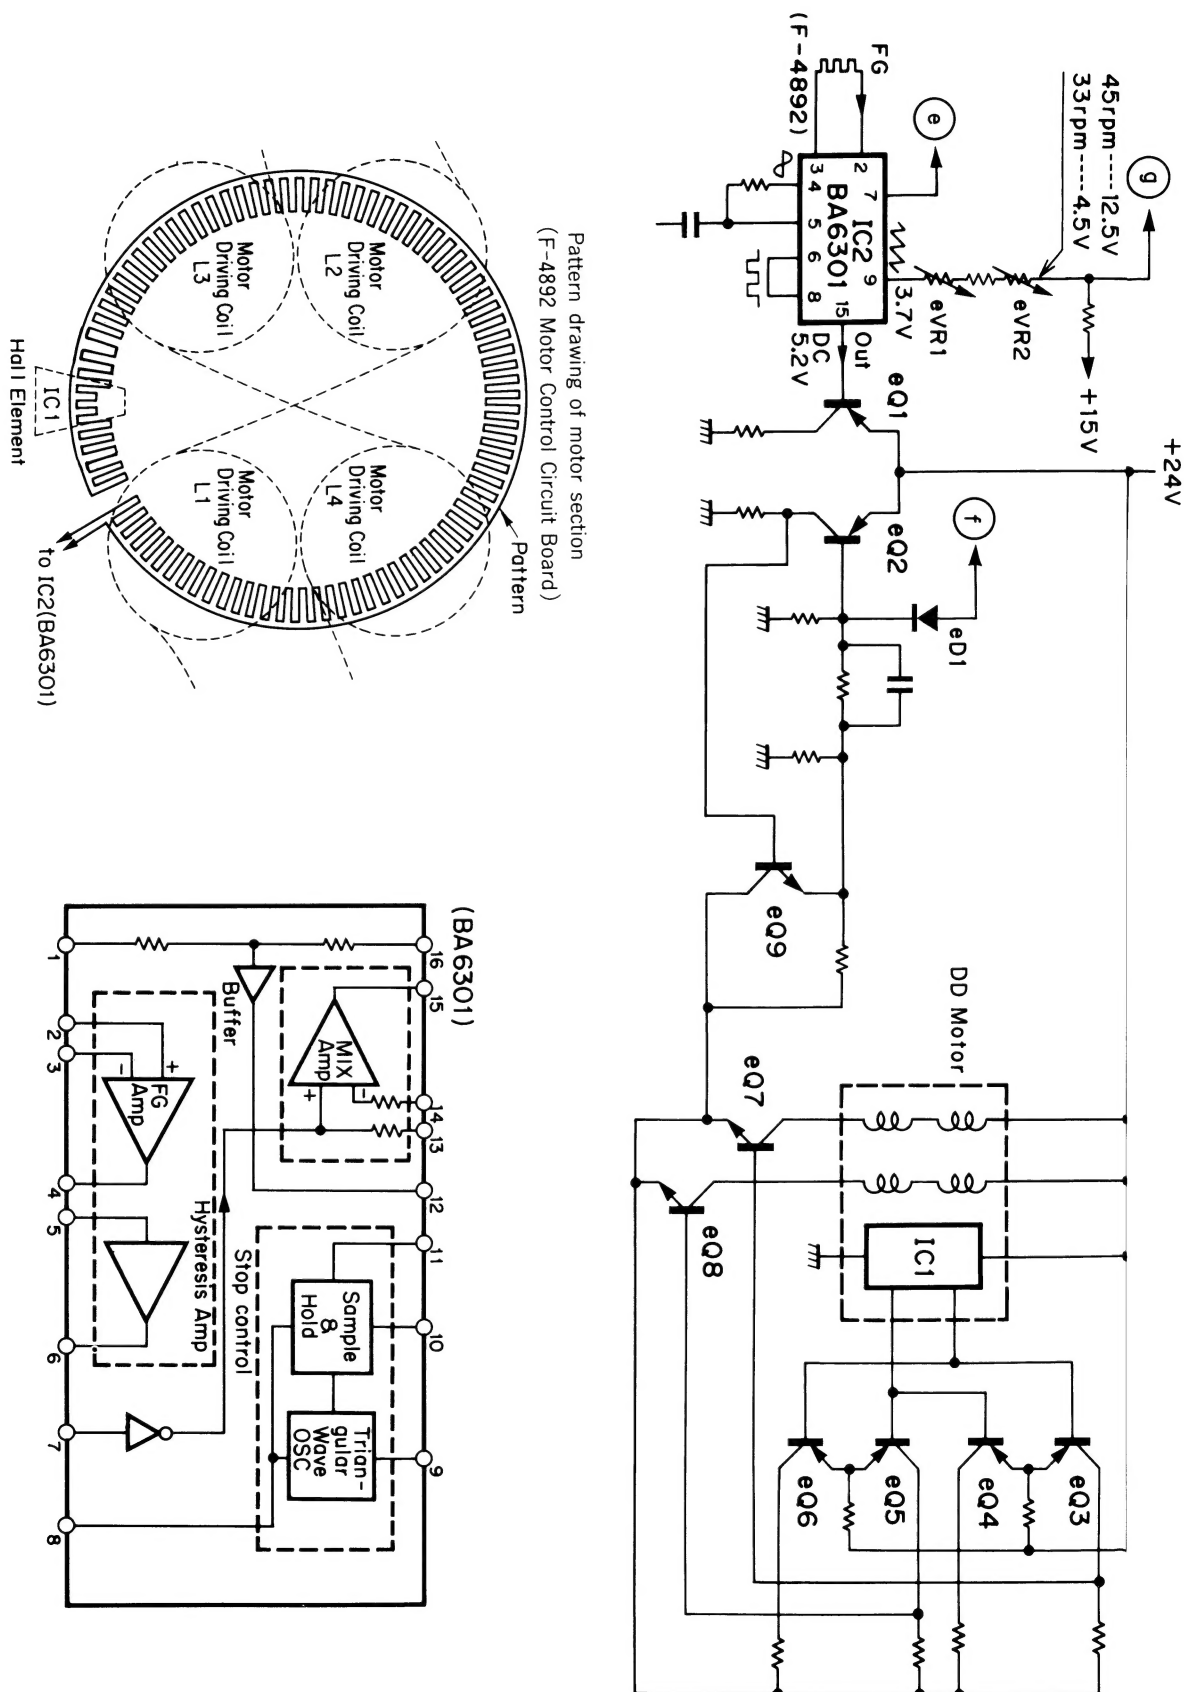

1. BLOCK DIAGRAM

1-1. Tonearm Control Circuit

1-2. Disk Motor Drive Section

e,f,g connected to Tonearm Control Circuit on Page 2.

2. Microcomputer IC, μ PD7507C-114 operation timing

2-1. Automatic record disk selection timing

Automatic record disk selection (When pin 7 is set to High)

	Input for 2.5 sec		Output after 2.5 sec
	Pin 8	Pin 9	Pin 36
No disk			L
30 cm disk			L
17 cm disk			H

• When the DD Motor is kept ON after the above, the input is checked and output every 1.5s, and in the case of the input "no disk", it returns and the DD Motor is set to OFF.

2-2. Lead-in & Return timing

2-3. DC motor control

	DCM 1 Pin 32	DCM 2 Pin 33	DCM 3 Pin 34
Tonearm inward direction movement	H	L	L
Tonearm outward direction movement	L	L	H
Stop	L	L	L
Selection of servo operation	L	H	L

2-4. Key operation

• START/STOP (pin 24) key

Condition				Result		
LIFTER (Pin 31)	ARM RESET (Pin 25)	DDM 4/3 (Pin 38)		Auto- operation	DDM s/s (Pin 38)	REPEAT
Up L	Arm rest L	OFF H		Start		—
Up L	Arm rest H	OFF H		—	ON L	—
Down H	Arm rest H	OFF H		—	ON L	—
* Up L	Arm rest H	ON L		Return		Clear
Down H	Arm rest H	ON L		Return		Clear
During auto start operation				Return		Clear
During auto return operation				—		Clear

* Returns after 2.5s via the key operation during the UP operation using the UP/DOWN key.

• UP/DOWN (pin 17) key

Condition			Result
LIFTER (Pin 31)	ARM RESET (Pin 25)		LIFTER (Pin 31)
Up L	Arm rest L		—
Up L	Arm rest H		Down H
Up L	End position		—
Down H	Arm rest H		Up L
During auto-start horizontal operation			—
During auto-return horizontal operation			—

• Manual-in (pin 15) key

Condition			Result
LIFTER (Pin 31)			
Up L	Position other than end		Moves inwards while this key is pressed *1
Up L	End position		—
Down H			—
During auto-start/return operation			—

• Manual-out (pin 16) key

Up L	Position other than arm-rest	Moves outwards while this key is pressed *2
Up L	Arm-rest	—
Down H		—
During auto-start/return operation		—

Cautions:

- The manual-in/manual-out key operations can be accepted by the UP/DOWN key-in after 2.5s during the lift-up operation.
- *1. Stops at the end position. Stops at the 30cm stop position when the DDM is set to OFF.
- *2. Stops at the arm-rest. DDM is also set to OFF.

• REPEAT (pin 14) key

- (1) This key operation is always accepted by the push on/push off operation. Synchronized with repeat indication.
- (2) Cleared when there is no record disk for auto-start with the START/STOP key set to the stop mode.
- (3) The lead-in resets the count at the arm-rest and returns lead-in to the set position of the record disk. With the automatic record disk type selection, the last record disk selection input is checked at the arm-rest and lead-in takes place.
- (4) Repeat ON/OFF is effective during the auto return operation.
- (5) With the repeat OFF during the auto start operation, repeat is set to OFF but the operation is left as it is and lead-in takes place.

2-5. Other items

- Chattering prevention time: 20ms

Applicable input: 1 ~ 7

- Operation indication (13)

- (1) Set to H/L at 2.5Hz (Duty 50%) under the following conditions.
 - From the START/STOP key-in until the muting OFF in the auto start mode
 - From the muting ON until the arm is reset \overline{L} in the auto return mode
 - While the tonearm is being moved by the manual IN/OUT key operation
 - For 2.5s from the UP/DOWN key-in during the UP operation and until the muting OFF during the DOWN operation
- (2) Set to H/L at 9Hz (Duty 50%) under the following conditions.
 - For 2.5s from the judgement time until the arm is reset \overline{L} , when "no record disk" is input during the auto start operation with automatic record disk selection.

6. ADJUSTMENT

6-1. Lead-in operation adjustment

- 1) Press the START button with a 30cm record disk with a narrow lead-in groove to do the lead-in operation, and adjust the lead-in adjusting cam (See Fig. 6-3) so that the stylus tip may come down to the center of the lead-in groove.
- 2) Perform the lead-out operation and check that the stylus tip lifting position is at the lead-out groove.
- 3) Perform the lead-in operation with a 17cm record disk with a narrow lead-in groove and check that the stylus tip comes down in the lead-in groove.

6-2. Tonearm height adjustment

* Before adjustment, remove the player case cover.

- 1) Move the tonearm by manual operation so that the stylus tip is set to the position approx. 110mm from the center of the platter.
- 2) Adjust the tonearm height adjusting screw (Refer to the Top View on page 8) so that the distance between the record disk and the stylus tip is 4.5~6.0mm.

6-3. Speed adjustment (Refer to Fig. 6-3.)

- 1) Set the speed to 33 rpm and adjust the eVR1 on the DD motor control board using a small screwdriver so that the 33 rpm strobo pattern is seen to stop.
- 2) Set the speed to 45 rpm and adjust the eVR2 on the DD motor control board using a small screwdriver so that the 45 rpm strobo pattern is seen to stop.

Fig. 6-3 <Bottom View>

6-4. Arm servo adjustment

* Before adjustment, remove the cabinet.

- 1) Connect a DC voltmeter between point (A) and GND (Refer to Fig. 6-5.).
- 2) Move the tonearm by manual operation and stop the stylus tip at a position approx. 110 mm from the center of the platter.
- 3) Move the tonearm rightward by hand until its stop position, and adjust fVR2 (Fig. 6-5) so that the reading of the DC voltmeter is $3.0 \pm 0.2V$.
- 4) Turn fVR1 (Fig. 6-5) fully counterclockwise.
- 5) Remove the connector leads (B) from the connector (Refer to Fig. 6-5).
- 6) Place a spacer (approx. 4 mm in height) under the arm lifter. (Fig. 6-4)
- 7) Press the START/STOP key to rotate the platter.
- 8) Press the UP/DOWN key to lower the tonearm and then gradually turn fVR1 clockwise and stop turning it when the tonearm starts moving inward.
- 9) Actually play a 30 cm record disk and check that the stylus does not move when the UP/DOWN key is pressed at the position approx. 110 mm from the center of the platter to move the arm lifter up and down several times. Turn fVR1 a little clockwise when the stylus moves outward while the lifter is lifting.

7. PACKING LIST

Parts List

Parts No.	Stock No.	Description
1	47767500	Dust Cover Ass'y <P-L45>
	47877700	Dust Cover Ass'y <P-L55>
1-1	48179600	Hinge Cap (Silver Model)
	13187400	Hinge Cap (Black Model)
1-2	48179700	Side Hinge (L)
	48179800	Side Hinge (R)
2		Polyethylene Bag <P-L45>
3	47817100	Inner Packing, rear
4	47816900	Inner Packing, front
5	91122710	Polyethylene Bag
6		Binder
7		Turntable Unit
8	13012300	45 rpm Adaptor
9	47800100	Protector
10	00449700	Screw, M4 x 12 Pan Head SEMS
11	13146700	Turntable Sheet <XX, CSA, EU, BS, AS>
	13146800	Turntable Sheet
12	13143810	Turntable Platter
13		Polyethylene Bag
14 <P-L45>	47878500	Carton Case (Silver Model with Dust Cover)
	47878600	Carton Case (Black Model with Dust Cover)
	47878700	Carton Case (Silver Model without Dust Cover)
	47878800	Carton Case (Black Model without Dust Cover)
<P-L55>	47792100	Carton Case (Silver Model with Dust Cover)
	47792200	Carton Case (Black Model with Dust Cover)
	47792300	Carton Case (Silver Model without Dust Cover)
	47792400	Carton Case (Black Model without Dust Cover)

Note: There are two types of units in P-L45/L55.

- 1) The unit with a Dust Cover Ass'y.
 - 2) The unit without a Dust Cover Ass'y.
- (M) mark is indicated on Carton Case)

8. ACCESSORY LIST

Parts List

Parts No.	Stock No.	Description
	46267300	2 pin Mini Plug Cord
	13012300	45 rpm Adaptor
	46967600	Operating Instruction (P-L45/L55)
